SFS01-V2 3G/4G Remote start control module overview.

1. Supplied with 3m harness and IP67 electrical enclosure
2. Easy DIY installation
3. Supplied with fitting kit
4. Fully programed prior to supply and simply needs an activated pre-paid sim card
5. Unit has multiple start programing and will automatically make 5 start attempts if required.
6. 3G and 4G compatible on multiple frequencies will operate with all Australian Telcos.
7. Sends out conformation text so you know the engine has started and the pump is pumping.
8. Will send out automated text if there is any change in engine or pump status.
9. Monitors engine starting battery and will inform you by text if the battery needs attention, charging or replacing.
10. Very user friendly to operate, no complicated codes or text strings required.
11. Can have up to 10 authorised operators, cannot be activated by unauthorised callers.
12. Can be operated from any global location that has mobile coverage.
13. Can be setup to activate using heat switches.
14. Wireless RF control model available, allows operation from multiple emergency start buttons. [specific model must be ordered cannot be added later]
15. Can be setup to start and stop on a scheduled timer.
16. Compatible with any electric start/ electric stop diesel engine.
